

LIFE PRIORITY™

YOUR LIFE, OUR PRIORITY

CoQ PRIORITY™

A HIGHLY ABSORBABLE FORM OF CoQ₁₀ FOUND IN EVERY CELL IN THE BODY

CoQ₁₀ is a coenzyme found in every cell in the body. CoQ₁₀ is the energy source for all our organs. Our bodies make it from the foods we eat. Unfortunately, as we age our bodies don't make enough. Getting CoQ₁₀ in a supplement form is the easiest way to ensure that the body gets what it needs.

- It is a fat-soluble substance, which resembles a vitamin.
- Discovered in 1957
- CoQ₁₀ is naturally produced by the body

Your heart beats about 100,000 times a day to get its job done and is fueled by CoQ₁₀, which is why so many scientific studies have shown that it confers powerful support for your entire cardiovascular system.

Life Priority™ offers Kaneka QH™ Ubiquinol, one of the most bio-available and active forms of CoQ₁₀. There are two forms of CoQ₁₀: ubiquinone and ubiquinol. Although both forms are effective, 95 percent of the CoQ₁₀ that naturally exists in your body is ubiquinol. So, if you take a supplement containing the ubiquinol form, your body can use it right away. On the other hand, if you take ubiquinone, your body will need to convert it to ubiquinol, and there's a possibility that the conversion may not happen efficiently

CoQ PRIORITY™ helps:

- Restore youthful energy
- Support cardiovascular health
- Promote optimal cellular function
- Fight free radicals

Those using cholesterol medication should consult with their physician regarding the value of using CoQ₁₀.
