

LIFE PRIORITY™

YOUR LIFE, OUR PRIORITY

JOINT DECISION™

ESSENTIAL FOR HEALTHY CARTILAGE AND JOINT HEALTH

Joint Decision™ helps to supply pure Glucosamine Hydrochloride (HCl), a natural compound that nourishes the connective tissue structures found in cartilage and joint fluid. Glucosamine Hydrochloride (HCl), which has the highest potency of active Glucosamine among Glucosamine forms.

Glucosamine is a molecule manufactured by cells in our body from the food that we eat. It is a component that our bodies cannot survive without. All cartilage, regardless of where it is located in the body must have an adequate supply of glucosamine. Cartilage gets glucosamine from the synovial fluid that surrounds all of our joints. By taking **Joint Decision™**, you increase the glucosamine level in the fluid around the joint which allows the cartilage to do what is designed to do: properly cushion the joint movements.

Valuable information about **Joint Decision™**:

- A true nutraceutical, not a drug.
- Glucosamine is a sugar molecule manufactured by cells in our body from our food supply.
- Getting enough glucosamine from foods in the diet is not practical.
- One of the major building blocks of articular cartilage and of synovial fluid, the lubricating and cushioning material in joints.
- Supports and promotes wound healing
- Not intended for use in the treatment, cure, prevention, or mitigation of any diseases or disorder.
- Numerous Clinical studies support the safety and value of glucosamine HCL.
- Supports healthy joint function
- Helps preserve healthy joint structure
- Supports cartilage health
- Aids in wound healing

Supplement Facts

Serving size 1 capsule
Servings per container 90

Amount Per Serving	% Daily Value
Glucosamine HCl 500 mg	†

† Daily Value not established.

Other Ingredients: Gelatin capsule, rice flour, magnesium stearate.

SUGGESTED USE:

As a dietary supplement, take 3 capsules daily (2 in the morning and 1 in the evening) for the first 30 to 60 days, or as directed by your health care professional. After joint pain symptoms subside, adjust daily dosage thereafter to maintain desired comfort level. Maintenance levels will vary between individuals. Dosage may be increased in times of high activity or severe discomfort.
